PROFILE

I am a software engineering student passionate about solving complex problems and developing innovative solutions. I have strong proficiency in programming languages such as Java, C++, and Python, with in-depth expertise in machine learning, including both supervised and unsupervised models. Driven by a constant desire to learn, I am actively seeking opportunities to put my theoretical knowledge into practice in a stimulating professional environment.

EDUCATION

National Institute of Applied Sciences and Technology (INSAT)

- **Software Engineering** (2022-2027)

EXPERIENCE

- **WeLyne – AI & fullstack Engineer Intern (Internship + Part-Time)** **June – December 2025**
  - Built an AI system for hand & foot detection and size estimation from images using **YOLOv8** and **MediaPipe**.
  - Deployed a FastAPI service and integrated it into a **React** web app and **Laravel**.

PROJECTS

- **DinePlot - Computer Vision Project**
  - Developed a real-time table and chair occupancy tracking solution using computer vision.
- **RumorCheck - NLP & ML Project**
  - Built a fake news detection platform using NLP and machine learning.
- **Delivery Agent with search algorithms - Springboot & React project**
- **Tunisan Real Estate Price Prediction Platform**

SKILLS

- **Programming Languages & Web Development**: C, C++, HTML/CSS, JavaScript, React, NestJs, Laravel, Angular, .NET, Symfony, PL/SQL, Java, Python, R
- **Machine Learning & Data Science**: Pandas, Scikit-learn, Seaborn, Matplotlib, NumPy, Computer vision, Mediapipe

---

INTERESTS

- Participation in programming competitions (Problem-solving and algorithmic thinking)
- Organizing events like *CodeQuest* (competitive programming competition)
- Mastery of time management through various responsibilities (e.g., media officer)
- Vice-President at Lions Club Tunis INSAT (2025-2026)
